

FUNDAMENTALS OF ESG PRINCIPLES, REGULATIONS AND INVESTMENT

29 APRIL 2025 | 9.00AM-5.30PM
CONFERENCE HALL, SECURITIES COMMISSION MALAYSIA

PROGRAMME OVERVIEW

Sustainability: Your Business's Secret Weapon

In today's fast-changing world, sustainability isn't just a buzzword—it's a game-changer. Companies that embrace Environmental, Social, and Governance (ESG) principles aren't just doing the right thing; they're setting themselves up for long-term success.

Why does this matter? Sustainable and Responsible Investments (SRI) are pushing businesses to think beyond profits and consider environmental and social factors. And guess what? Investors, consumers, and regulators are paying attention. Businesses that weave sustainability into their strategy stay ahead of the curve, attract investment, and build stronger relationships with stakeholders.

But it's not just about keeping up—it's about gaining a competitive edge. Companies that adopt sustainability frameworks and track their ESG performance **can spot risks early, navigate climate regulations, and unlock new growth opportunities.** A smart sustainability strategy means **better efficiency, stronger brand appeal, and long-term resilience** in a world that's rapidly shifting toward sustainability.

At the end of the day, sustainability isn't just about doing good—it's about building a future-ready business. Companies that get this right will not only manage risks and drive profitability but also lead the way in a greener, smarter economy.

PROGRAMME OBJECTIVE

This programme deep dives into **key sustainability and ESG principles**, helping you stay ahead of **emerging global and local trends, regulations, and best practices.** You'll gain **practical strategies** for integrating ESG into your business while aligning with recognised sustainability reporting standards and frameworks.

Whether you're looking to enhance corporate resilience, attract investors, or future-proof your business, this programme equips you with the **insights and tools** to turn sustainability into a strategic advantage.

ICF COMPETENCY LEVEL

- Functional (Technical) – Sustainability/SRI Analysis (Proficiency Level 3)
